In reply to our telephone conversation today I suggest we need to evaluate your visual graded VSG 'Species' for its bending stiffness, along with the bending, tension, compression and shear strengths in accordance with AS/NZS4063.1:2010.

Thus the testing for structural properties is:

- Bending strength and stiffness as a joist – 30 pieces of 90x45 with a minimum length of 1.8m are required. Our charge for this testing is based on \$25 per test making a total for the 30 pieces of \$750+GST.
- Tension Strength – 30 pieces of 90x45 with a minimum length of 3.9m are required. Our charge for this testing is based on \$30 per test making a total for the 30 pieces of \$900+GST.
- Shear Strength – 30 pieces of 90x45 with a minimum length of 0.72m are required. Our charge for this testing is based on \$25 per test making a total for the 30 pieces of \$750+GST.
- Compression Strength – 60 pieces of 90x45 with a minimum length of 0.36m are required. Our charge for this testing is based on \$30 per test making a total for the 30 pieces of \$1800+GST.

With respect to the structural testing I trust this meets with your approval, please respond by Email or Fax accepting this quote if you wish to proceed.

Doug Gaunt

RISK AND LIMITATION OF LIABILITY: Scion's liability to the Client arising out of all claims for any loss or damage resulting from this work will not exceed in aggregate an amount equal to two times the Service Fees actually paid by the Client to Scion. Scion will not be liable in any event for loss of profits or any indirect, consequential or special loss or damage suffered or incurred by the Client as a result of any act or omission of Scion under this Agreement.

USE OF NAME: The Client will not use Scion's name in association with the sale and/or marketing of any goods or services
